After a delay of more than 3 years, the Flemish Community implemented Directive 95/47/EC of 24 October 1995 on the use of standards for the transmission of television signals (see IRIS 1996-2: 5). This Directive was only partly implemented by an earlier decision of the Flemish Government of 13 October 1998. The Decree of the Flemish Parliament of 3 March 2000 now has fully implemented the European rules on digital television.
