At the beginning of 2007, the Republic of Austria and the Grand Duchy of Luxembourg reached agreement on co-operation in the audiovisual sector. The agreement entered into force in early September 2007. The aim of film co-production is to support the film industry and promote economic and cultural exchanges between the two states.

Films co-produced under this agreement are to enjoy the privileges that apply in both countries to domestically made films. The preconditions for the recognising co-productions as such include the requirement for the producer's registered office to be in a contracting state, the employment of staff from the contracting states in proportion to their share of the funding, and certain contractual agreements to share proceeds and duplication rights. The overall aim is to ensure a balance between the artistic, technical and financial contributions from both countries. This will be monitored by a commission.
